CONTENTS OF VOLUME 44

NUMBER 1, SEPTEMBER, 1960

GOLDSTEIN, DAVID A., and SOLOMON, A. K. Determination of equivalent pore radius for human red cells by osmotic pressure measurement 1

CASTAÑEDA-AGULLÓ, M., and DEL CASTILLO, LUZ M. On dielectric constant and enzymatic kinetics. III. Interrelationships of dielectric constant and pH 19

CARLSON, FRANCIS D., and SIGER, ALVIN. The mechanochemistry of muscular contraction. I. The isometric twitch 33

HOKIN, LOWELL E., and HOKIN, MABEL R. Studies on the carrier function of phosphatidic acid in sodium transport. I. The turnover of phosphatidic acid and phosphoinositide in the avian salt gland on stimulation of secretion 61

LEFEVRE, P. G., and MCGINNISS, G. F. Tracer exchange *vs.* net uptake of glucose through human red cell surface. New evidence for carrier-mediated diffusion 87

WOLBARSHT, M. L. Electrical characteristics of insect mechanoreceptors 105

COLE, KENNETH S., AND MOORE, JOHN W. Ionic current measurements in the squid giant axon membrane 123

TOSTESON, D. C., and HOFFMAN, J. F. Regulation of cell volume by active cation transport in high and low potassium sheep red cells 169

BERNHARD, C. G., and OTTOSON, D. Comparative studies on dark adaptation in the compound eyes of nocturnal and diurnal Lepidoptera 195

BERNHARD, C. G., and OTTOSON, D. Studies on the relation between the pigment migration and the sensitivity changes during dark adaptation in diurnal and nocturnal Lepidoptera 205

NUMBER 2, NOVEMBER, 1960

HOKIN, MABEL R., HOKIN, LOWELL E., and SHELP, WELDON D. The effects of acetylcholine on the turnover of phosphatidic acid and phosphoinositide in sympathetic ganglia, and in various parts of the central nervous system *in vitro* 217

OLMSTEAD, EDWIN G. Efflux and influx of erythrocyte water 227

CRANEFIELD, PAUL F., and GREENSPAN, KALMAN. The rate of oxygen uptake of quiescent cardiac muscle 235

SEAMAN, G. V. F., and HEARD, D. H. The surface of the washed human erythrocyte as a polyanion 251

KRUEGER, ALBERT P., and SMITH, RICHARD F. The biological mechanisms of air ion action. II. Negative air ion effects on the concentration and metabolism of 5-hydroxytryptamine in the mammalian respiratory tract 269

KENNEDY, DONALD. Neural photoreception in a lamellibranch mollusc 277

WEED, ROBERT I., and ROTHSTEIN, ASER. The uptake of divalent manganese ion by mature normal human red blood cells 301

Alma College Library
Alma, Michigan

DURBIN, RICHARD P. Osmotic flow of water across permeable cellulose membranes 315

PAGE, ERNEST, and SOLOMON, A. K. Cat heart muscle *in vitro*. I. Cell volumes and intracellular concentrations in papillary muscle 327

SHANES, ABRAHAM M., and GERSHFELD, NORMAN L. Interactions of veratrum alkaloids, procaine, and calcium with monolayers of stearic acid and their implications for pharmacological action 345

HEMPLING, H. G. Permeability of the Ehrlich ascites tumor cell to water 365

GRIM, EUGENE, and SOLLNER, KARL. True anomalous osmosis in multi-solute model membrane systems 381

NAYLER, W. G. A study of the "staircase" in ventricular muscle and its relationship to the inotropic activity of certain drugs 393

KAYE, LEON, and MOMMAERTS, W. F. H. M. The role of calcium ions in the acceleration of resting muscle glycolysis by extracellular potassium 405

BRADY, A. J., ABBOTT, B. C., and MOMMAERTS, W. F. H. M. Inotropic effects of trains of impulses applied during the contraction of cardiac muscle 415

NUMBER 3, JANUARY, 1961

BECKER, FREDERICK F. Studies on the hemolytic properties of protamine 433

JOHNSON, EDWARD A., and TILLE, J. Investigations of the electrical properties of cardiac muscle fibers with the aid of intracellular double-barrelled electrodes 443

MARONEY, S. P., JR. Shape and volume changes in frog erythrocytes following ultraviolet radiation 469

POLLERI, A., MENOZZI, P., NORMAN, D., and HECHTER, O. Effect of inhibitors on D-xylose permeability in rat diaphragm muscle 479

MCDOUGAL, D. B., JR., SCHULZ, D. W., PASSONNEAU, J. V., CLARK, J. R., REYNOLDS, M. A., and LOWRY, O. H. Quantitative studies of white matter. I. Enzymes involved in glucose-6-phosphate metabolism 487

FURCHGOTT, R. F., EHRREICH, S. J., and GREENBLATT, E. The photoactivated relaxation of smooth muscle of rabbit aorta 499

WITTENBERG, JONATHAN B. The secretion of oxygen into the swim-bladder of fish. I. The transport of molecular oxygen 521

WITTENBERG, JONATHAN B., and WITTENBERG, BEATRICE A. The secretion of oxygen into the swim-bladder of fish. II. The simultaneous transport of carbon monoxide and oxygen 527

GIESE, ARTHUR C., and LUSIGNAN, MOLLY. Retardation of regeneration and division of *Blepharisma* by ultraviolet radiation and its photoreversal 543

DEYRUP, INGRITH J., and DAVIES, R. E. The effect of temperature on the uptake of radiosulfate by rat renal tissue from radiosulfate-containing solutions *in vitro* 555

NAKA, KÉN-ICHI. Recording of retinal action potentials from single cells in the insect compound eye 571

JESAITIS, MARGERIS A. The inheritance of the glucose component of the phage nucleic acids 585

RUCK, PHILIP. Electrophysiology of the insect dorsal ocellus. I. Origin of the components of the electroretinogram 605

RUCK, PHILIP. Electrophysiology of the insect dorsal ocellus. II. Mechanisms of generation and inhibition of impulses in the ocellar nerve of dragonflies 629

RUCK, PHILIP. Electrophysiology of the insect dorsal ocellus. III. Responses to flickering light of the dragonfly ocellus 641

NUMBER 4, MARCH, 1961

GIEBISCH, GERHARD. Measurements of electrical potential differences on single nephrons of the perfused *Necturus* kidney 659

WHITTEMBURY, GUILLERMO, and WINDHAGER, ERICH E. Electrical potential difference measurements in perfused single proximal tubules of *Necturus* kidney 679

WHITTEMBURY, GUILLERMO, SUGINO, NOBUHIRO, and SOLOMON, A. K. Ionic permeability and electrical potential differences in *Necturus* kidney cells 689

NAORA, H., NAORA, H., MIRSKY, A. E., and ALLFREY, V. G. Magnesium and calcium in isolated cell nuclei 713

URIST, MARSHALL R., and SCHJEIDE, ARNE O. The partition of calcium and protein in the blood of oviparous vertebrates during estrus 743

BENNETT, M. V. L., WURZEL, M., and GRUNDFEST, H. The electrophysiology of electric organs of marine electric fishes. I. Properties of electroplaques of *Torpedo nobiliana* 757

BENNETT, M. V. L., and GRUNDFEST, H. The electrophysiology of electric organs of marine electric fishes. II. The electroplaques of main and accessory organs of *Narcine brasiliensis* 805

BENNETT, M. V. L., and GRUNDFEST, H. The electrophysiology of electric organs of marine electric fishes. III. The electroplaques of the stargazer, *Astroscopus y-graecum* 819

NUMBER 5, MAY, 1961

BIANCHI, C. P. The effect of caffeine on radiocalcium movement in frog sartorius 845

NORTHROP, JOHN H. Factors controlling the production of lysogenic cultures of *B. megatherium* 859

SEARS, D. F., and EISENBERG, R. M. A model representing a physiological role of CO_2 at the cell membrane 869

SMYTH, DEREK G., BATTAGLIA, FREDERICK C., and MESCHIA, GIACOMO. Studies on the Bohr effect of sheep hemoglobin 889

PHILIPSON, LENNART. Chromatographic separation, and characteristics of nucleic acids from HeLa cells 899

CRESCITELLI, FREDERICK, and GARDNER, ERNEST. Correspondences in the behavior of the electroretinogram and of the potentials evoked at the visual cortex 911

SJODIN, R. A. Some cation interactions in muscle 929

VILLEGAS, RAIMUNDO, and BARNOLA, FLOR V. Characterization of the resting axolemma in the giant axon of the squid 963

WERMAN, R., MCCANN, F. V., and GRUNDFEST, H. Graded and all-or-none electrogenesis in arthropod muscle. I. The effects of alkali-earth cations on the neuromuscular system of *Romalea microptera* 979

WERMAN, R., and GRUNDFEST, H. Graded and all-or-none electrogenesis in arthropod muscle. II. The effects of alkali-earth and onium ions on lobster muscle fibers 997

NUMBER 6, JULY, 1961

JEFFERSON, W. E., JR., and SISCO, GLADYS. The influence of exogenous steroids on the growth of *Aspergillus niger* and *Torula utilis* 1029

MCLENNAN, H. The effect of variations in the intra- and extracellular ion concentrations upon the electrical activity of normal and dystrophic mouse skeletal muscle 1047

COLE, KENNETH S. Non-linear current-potential relations in an axon membrane 1055

NAYLER, WINIFRED G. The importance of calcium in poststimulation potentiation 1059

STRICKHOLM, A. Impedance of a small electrically isolated area of the muscle cell surface 1073

KENNEDY, DONALD, and BRUNO, MERLE S. The spectral sensitivity of crayfish and lobster vision 1089

CASTAÑEDA-AGULLÓ, M., DEL CASTILLO, LUZ M., WHITAKER, J. R., and TAPPEL, A. L. Effect of ionic strength on the kinetics of trypsin and alpha-chymotrypsin 1103

COSMOS, ETHEL, and HARRIS, ERIC J. *In vitro* studies of the gain and exchange of calcium in frog skeletal muscle 1121

STEINBACH, H. BURR. Na extrusion by the sartorius of *Rana pipiens* 1131

DODT, EBERHARD, and JESSEN, KARL HEINZ. The duplex nature of the retina of the nocturnal gecko as reflected in the electroretinogram 1143

RENKIN, EUGENE M. Permeability of frog skeletal muscle cells to choline 1159

FINKELSTEIN, ALAN. Lithium-induced oscillations of potential and resistance in isolated frog skin 1165

DELBRÜCK, M., and VARJÚ, D. Photoreactions in *Phycomyces*. Responses to the stimulation of narrow test areas with ultraviolet light 1177

SCHULTZ, STANLEY G., and SOLOMON, A. K. Determination of the effective hydrodynamic radii of small molecules by viscometry 1189

GOODGAL, SOL H., and HERRIOTT, ROGER M. Studies on transformations of *Haemophilus influenzae*. I. Competence 1201

GOODGAL, SOL H., and HERRIOTT, ROGER M. Studies on transformations of *Haemophilus influenzae*. II. The molecular weight of transforming DNA by sedimentation and diffusion measurements 1229
